TEST REPORT

CLIENT: WOVEN IMAGE PTY LTD
37-39 CHARD ROAD
BROOKVALE NSW 2100

TEST NUMBER: 7-S9555-BN
ISSUE DATE: 01/03/2013
PRINT DATE: 01/03/2013

SAMPLE DESCRIPTION
Clients Ref: "Contour"
Woven fabric supplied with polyurethane foam
Nom Comp: 98% Echo (TM) Wool, 2% Lycra
Nom Width: 137cm
Nom Weight: 575 g/lin.m, 420 g/m2
Colour: Blue

BS 5852-2006
Assessment of the ignitability of upholstery seating
By smouldering and flaming ignition sources

SECTION 4
Methods of test for the ignitability of upholstery

SECTION 12.2
Smouldering cigarette test (ignition source 0)

Ignition did not occur

Extent of damage

Cigarette burn time: 6.5 min
Progressive flaming time: N/A min
Progressive smouldering time: N/A min

Test assembly was not found to be smouldering when dismantled
Large test rig used
Test assembly self extinguished
Sample submitted was conditioned at 20+/ -2degC & 65+/ -3 %
Relative Humidity for a minimum of 24hrs prior to testing

Rating: Section 4 (Source 0) NI/0
NI = no ignition I = ignition 0 = source 0

The above test results relate only to the ignitability of the combination of upholstery composites (Section 4 of BS 5852-2006) under the particular conditions of test stated. They are not intended as a means of assessing the full potential fire hazard of the materials or products in use.

BS 5852-2006
Assessment of the Ignitability of Upholstery Seating by Smouldering and Flaming Ignition Sources

SECTION 4
Methods of test for the ignitability of upholstery composites

SECTION 12.3
Flame test (Ignition Sources 1, 2 or 3)
Ignition Source: 1
Ignition did not occur

Extent of damage Vertical Horizontal mm
Length 8 6
Width 6 4
Depth 0 0

Ignition source time: 20 sec
Sample flame time: N/A
Sample smouldering time: N/A
Time for burning to reach Extinguishing time: N/A

Test assembly self extinguished
Large test rig used
Sample submitted was conditioned at 20+/-2degC & 65+/-3 % Relative Humidity for a minimum of 24hrs prior to testing

Rating: Section 4 NI/1
NI = no ignition I = ignition
1 = source 1 2 = source 2 3 = source 3

The above test results relate only to the ignitability of the combination of upholstery composites (Section 4 of BS 5852-1990) under the particular conditions of test stated: they are not intended as a means of assessing the full potential fire hazard of the materials or products in use.
